

## Stages of Getting on the net

### Items you need

- 1, First you need to acquire the DOMAIN NAME, (Name Registration)
- 2, Then you need a web server to host this name (Hosting)
- 3, Then you need the Web site Designing and Creating, this is the pages that people actually look at when browsing the web.

### Name Registration

You need to register a DOMAIN Name, this is usually registered for a period of one year, this registration is basically the rental paid to use the name [\*\*www.whatever-you-choose.es\(com\)\*\*](http://www.whatever-you-choose.es(com)) on the world wide web (WWW/ Internet), as long as the rentals is paid every year no one else can use the name.

### Hosting

Just having the name does not provide you with an Internet presence, for this you have to pay for HOSTING. Hosting is the allocation of disk space on a server permanently connected to the Internet, "Hosting Server".

Once the name is HOSTED you then have the ability to create email addresses and a web site. Hosting services are payable yearly and is 35 euro's and includes the setup of up to 5 email addresses,

For Example [\*\*info@whatever-you-choose.es\(com\)\*\*](mailto:info@whatever-you-choose.es) , [\*\*yourname@whatever-you-choose.es\(com\)\*\*](mailto:yourname@whatever-you-choose.es)

This price does not include the setup of the mail client on your PC or laptop, a mail client is a program that collects your email from the internet, examples of a client are "Outlook", "Outlook Express", "Windows Mail"

### Web Design

#### Once Off

Our basic website are charged as follows FIRST PAGE creation @ 100€ , then 50€ per page after that, thus a 4 page web site would be 250€,

E.G

Web design, to produce a standard template based site **Main page** (100€) + **About Us / Contact us** page (50€) + **Your Services** page (50€) **Client Testimonials** page (50€)

#### Optional Charges

For some companies having a STATIC web site will fit their purpose, thus unless anything major changes the web site will not change one month to the next. However some companies require a more DYNAMIC, site with changes being made every month or sometimes weekly.

For Example, Upcoming events (Artists , Trips, Offers etc)

For Changes the following charged will apply:-

- 1, New page addition – 75€, this is to add a completely new page.
- 2, Page Changes – changing the contents of a page, based on time taken, usually 1 hour (35€) should cover most changes unless a complete page redesign is required

If you think that you will be having regular page changes, for instance OFFERS, ENTERTAINMENT LISTINGS, PROPERTY LISTINGS, Menu's ETC, we can discuss the payment of a monthly admin fee that would cover this instead of paying on a per incident basis.

Examples assuming no more than 2 minor changes are made per month; the management charge would be 15€

### Site Promotion (optional)

If you want to publish your site we recommend GOOGLE ADWORDS, this is a pay per click service that helps promote your site based on search keywords terms.

We can arrange to set this up for you, our charge is 35€ for this service. (Note GOOGLE will require a credit / Debit card to collect the pay per clicks fee)

### Time Scale

The site can be completed in about 1-2 weeks from getting all the information.

### Cost Summary

Registration (Annual Charge)	35,00
Hosting (Annual Charge)	35,00
	<b>Total Yearly Charge 70,00</b>
Web Design Total 4 Pages	250,00
